Dr. Jane E. Henney, Commissioner
Food and Drug Administration
5600 Fishers Lane, HF-1
Rockville, MD 20857

Dear Dr. Henney:

I am alarmed about the seeming acceptance in some large circles of genetically engineered food and the assumption that it is not necessary for the public to be informed when purchasing them! I feel strongly that there are real dangers in tampering with the structure of the foods that sustain us, and I don't want to be subjected to them. It should be my right to make an informed choice.

Please support the pending lawsuit demanding safety testing and comprehensive labeling of foods, measures to protect the health of the nation. After all, isn't that what the FDA stands for?

Sincerely,

Barbara M. Jenkinson
